PROFESSIONAL SUMMARY

Computer Data Science undergraduate seeking Data Analyst, Business Intelligence, or technology internship opportunities. Developed portfolio projects spanning Power BI analytics dashboards and a full-stack AI-powered web application. Interested in using data, visualization, and software tools to turn problems into practical solutions.

TECHNICAL SKILLS

Power BI • Power Query • DAX/KPI measures • Data cleaning and transformation • Data visualization • Trend and segment analysis • Funnel analysis • Python • SQL • React.js • Vite • FastAPI • Git/GitHub • AI integration

PROJECTS

DITORUM AI — AI-Powered Full-Stack Web Application

• Developed a full-stack web application featuring AI Chat, Coding Lab for code generation/explanations/debugging, multilingual translation, and PDF/document interaction.
• Integrated a React.js/Vite frontend with a Python/FastAPI backend and Ollama Cloud; deployed the frontend and backend using Vercel and Render.
Project: https://github.com/gandharvashetty/DITORUM-AI

SalesPulse — Business Sales Performance & Opportunity Intelligence

• Built an interactive Power BI dashboard to explore sales performance across products, categories, regions, and time periods.
• Prepared and transformed sales data and presented KPIs and trends to support performance analysis and opportunity identification.
Project: https://github.com/gandharvashetty/sales-pulse-business-analytics

Customer Retention & Churn Analysis

• Analyzed the Telco Customer Churn dataset and built a two-page Power BI dashboard to examine churn patterns across customer segments and service-related factors.
• Created views to identify customer groups associated with higher churn and frame data-informed retention opportunities.
Project: https://github.com/gandharvashetty/customer-churn-retention-analytics

E-Commerce Funnel & Conversion Analytics

• Built a three-page Power BI dashboard using e-commerce behavioral event data to analyze product views, cart additions, and purchase events.
• Compared funnel activity and explored brand and product-level patterns to highlight potential drop-off points and growth opportunities.
Project: https://github.com/gandharvashetty/ecommerce-funnel-conversion-analytics

EDUCATION

Computer Data Science Undergraduate | Jawaharlal Nehru National College of Engineering | Expected graduation: 2028
